US totals based on states reporting.

State Notes:

- 15 Data for this reporting year differs from previous reported years for this table in the following way: Some clients received services during the Fiscal Year in more than one of our 14 CMHC regions. Previously, these clients were sometimes (but not always) being counted more than once in the yearly totals. This caused the "Total" lines in the different categories different depending on demographics reported on the client. In order to make all of the "Total" lines the same, we changed the queries this year. Our queries now only pick up the last client record from the region where the client received their last service during the Fiscal Year. All of the numbers in the new Tables 15 and 16 sum up to the same total.

Note:

US totals are based on states reporting.

This table uses data from URS/DIG Table 15.

US totals are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

State Notes:

Data for this reporting year differs from previous reported years for this table in the following way: Some clients received services during the Fiscal Year in more than one of our 14 CMHC regions. Previously, these clients were sometimes (but not always) being counted more than once in the yearly totals. This caused the "Total" lines in the different categories different depending on demographics reported on the client. In order to make all of the "Total" lines the same, we changed the queries this year. Our queries now only pick up the last client record from the region where the client received their last service during the Fiscal Year. All of the numbers in the new Tables 15 and 16 sum up to the same total.
